

Invisible benefits for comfort living

CSR's new wall and ceiling range provides invisible benefits and comfort.

The Gyprock™ High Performance range of walls and ceilings offers outstanding benefits, better performance and low maintenance to homeowners. The range includes specialty internal walls and ceilings which reduce noise transfer, offer better resistance against impact and greater protection against moisture and fire damage. Builders can offer clients various systems from the range in the early design phase for new homes or major renovations.

An increasing number of builders across the country are now offering systems from the range as either standard inclusions or upgrade options.

Builders can offer clients various systems from the range in the early design phase

'Our customers are smart, aspirational buyers who know their brands and appreciate quality. The Gyprock High Performance range offers invisible benefits and helps to eliminate the need for future maintenance,' says National Marketing Manager Tom Newton.

The Gyprock High Performance range offers Soundchek™ that features super high-density construction and sound-dampening characteristics that eliminate noise between rooms by up to 75 per cent.

Gyprock Impactchek™ is used in high traffic areas to protect walls against bumps and knocks.

Performance snapshot

Gyprock's High Performance range includes:

- Soundchek – super high-density construction and sound-dampening characteristics
- Impactchek – protects walls in high traffic areas
- Aquachek – protects against moisture and humidity damage.

Finally, Gyprock Aquachek™ is a highly effective plasterboard with moisture-resistant additives to protect against moisture and humidity damage and keep the walls looking new for years to come.
